Projects

Clue Scroll Emulator *HTML, CSS, JavaScript, JQuery, Flexbox*
https://github.com/Yonkai/old-portfolio/tree/oldbranch/Clue%20emulator
A website that simulates part of an MMO's random loot generation based on large scale data collection.

Bogoloops *HTML, CSS, JavaScript, SASS, Responsive Design*   https://github.com/Yonkai/bogoloops
A web toy that simulates the concept of "BogoMips" in the browser by seeing how many million (1,000,000) for loops your browsers claims to be able to do in a given time. Recent browser modifications due to novel timing attacks (like Spectre) skew the time, however.

Interactive Visual Sorting Algorithm Demo. *HTML, CSS, JavaScript, Slideout.js, Animation*
https://github.com/Yonkai/Sorting-Algorithms-In-JavaScript
A web toy that demonstrates visually what various sorting algorithms do to sort data sets, with UI implemented to control specific features and functionality.

Infinitegrid *CSS Grid, JavaScript, Noise, Randomness*   https://github.com/Yonkai/infinitegrid
A "Monkey that writes shakespear" program, displays all data in an organized grid.

Cloned Website *HTML, CSS, CSS-Grid, Templating*   https://github.com/Yonkai/Cloned-Site
Clone of a local banking site

BBS *NextJS, Nginx, MySQL, Axios*   http://www.daydreaming.me
